

HE SUGGESTS TRIBUTES TO PIONEER EXPLORERS

Speaker at Canadian Club's Weekly Luncheon in Montreal Addresses Members to Mr. Alexander MacKenzie and Sir George Simpson.

Montreal, March 25.—That Canada should erect magnificent monuments at the graves of the MacKenzie and Fraser Rivers to the memory of Sir Alexander MacKenzie and Sir George Simpson respectively, was the suggestion made at the Canadian Club's weekly luncheon in the Ball's Institute today, by Hon. Arthur Beyer, in a highly interesting address on "Pioneer's voyage to the northwest."

Mr. Beyer dealt more particularly with the achievements of the two explorers above mentioned. His speech of the day's Canada owed to Sir Alexander MacKenzie for the discovery of the Polar sea and adding impetus to British, American and French trade by explorations in the north.

Then he gave an account of Sir Alexander's journey by canoe through the Rocky Mountains and down the Fraser river to Pacific ocean, pointing out what a wonderful triumph of courage such a journey was under the conditions then prevailing.

Next he described the voyage round the world undertaken by Sir George Simpson who started out from Montreal with a party in canoe, and finally made his way to St. Petersburg and back to London. In that voyage, the limits of British possessions on the Pacific coast were fixed, for it was the treaty entered into between Sir George Simpson and the Russian government at the fur trading station of New Archangel which was produced an conclusive evidence of the boundary of British possessions when the Alaska award was made.

Then, Mr. Beyer dealt in a chair way with the adventures of his heroes and was accorded the hearty thanks of the gathering for his address.

MISSISSIPPI IS IN FLOOD.
St. Louis, Mo., Mar. 25.—Further news along the Mississippi were imminent this morning because of the rising temperature which followed yesterday's fall of snow. In the states of Kansas the Illinois river was rising slowly, and the states were advancing rapidly at points above St. Louis while the river was breaking everywhere.

The Illinois is at flood stage for most of its length and serious overflows are expected.

The Missouri is rising rapidly at Paducah, Mo., and there is anxiety over its stage as far as Omaha. With the water flowing over the new government levee at Point Pleasant, Mo., it is feared the whole of the New Madrid county will be overthrown by the Missouri within a day or two. The water was pouring into the low lands this morning.

TWO TRAGEDIES IN ITALY.

Marquis of Volpelli and his Companion slain in Hotel.

London, March 25.—The Daily Mail Home correspondent telegraphs that the Marquis of Volpelli, following to one of the old Neapolitan families, arrived at a Naples hotel this morning with a young American girl, well-known in the society circles. Shortly after their arrival the door of several rooms was heard to open and the Marquis and his companion were discovered mortally wounded by bullets in the head from a large pistol.

Another Home correspondent gives a different version of the affair as follows: A double tragedy occurred at the Hotel Macchietti, Naples, this morning, where the Marquis Salvatore Volpelli, a prominent Neapolitan nobleman, and Frederick Adams, a young officer, were found dead in one of the rooms.

Frederick Adams, who had been staying at the Hotel Excelsior for some time, went with Marquis Volpelli to the Hotel Macchietti for supper. They were heard quarrelling in the dining room. The Marquis was followed by the woman whose door was burst open the Marquis was found dead and the woman dying.

The police believe that Frederick Adams killed her companion, and then shot herself.

Another Double Tragedy.
Another double tragedy occurred on the Lake of Garda yesterday, where the bodies of Count Barbera, a member of a noble family of Parma, and his wife, were found on the bank of the lake. The count had shot his companion, and then committed suicide.

GIRL WEDS FATHER'S STEP.

For \$200000 Damage from Divine Will Performed Ceremony.

Montgomery City, Mo., March 24.—Benjamin Windsor, a farmer, has begun suit in the Circuit court here against the Rev. Samuel Palmer, of Montgomery county, for \$200,000 damages for marrying his fifteen-year-old daughter, Frances, to William House, nineteen years of age.

The father alleges that Mr. Palmer knew his daughter was under age and performed the ceremony over his repeated protests. He says the act was "illegal and unwarranted," and deprived the parents of the services of the girl. He asks \$100,000 actual and \$100,000 punitive damages.

Mr. Palmer asserts the young couple came to his home with a marriage license issued by the Jefferson county recorder, R. L. Beyer.

The girl told him that she was "over eighteen" and he was probably correct for she had written the number on a piece of paper and put it in her shoe.

The girl attended the middle school near Mexico, and they were married at the home of the clergyman but have failed so far to obtain the blessing of their parents.

Boatman Cries to Europe.

Montreal, March 24.—Le Droit announces that Henri Bouché will leave for a ten weeks' tour in Europe early next month. He does not intend to visit his division in the next provincial election, which is expected to take place about the end of May or early in June.

PARISIAN BANDITS ALARM THE PEOPLE

Police Appear to be Powerless Against the Organization Who Terrorize Community by Robberies and Heinousness—Criticisms of Prefect of Police Leprieux.

Paris, March 25.—The most recent exploit of the band of anarchists and road pirates who have put rural France in a state of terror by their audacity and relentlessness, has created a tremendous impression upon the quick imaginations of Parisians. Apparently the police are powerless against this organization of the enemies of society, and a certain section of the press is beginning to criticize strongly Louis Leprieux, the prefect of police, who is charged with allowing his administration to get out of step.

The feature of today's serious crimes is the very startling rapidity with which they were committed. An automobile was stalled by the bandits as it was passing through the Marquis forest of Senart, about 25 miles from Paris, at a quarter past eight o'clock this morning. From that place it was traced to Paris and Chantilly, where it arrived at half past ten. It occupied half an hour to get to Chantilly, 25 miles to the north of Paris, and returned to the suburbs of Paris with the spoils and made good their escape by half past eleven, after which all trace of them was lost.

The police lost no time in getting to work, and there are now six automobiles full of detectives scouring the suburbs of Paris, thus far without success.

MacLeod Passes \$100,000 Bill Way

MacLeod, March 25.—The by-law empowering the town of MacLeod to borrow \$100,000 for a new municipal building was ratified by a good majority over the two thirds vote required by the ratepayers today. It is intended to erect a building at once.

The plans are for the finest municipal edifice in western Canada. The building will contain in addition to the municipal offices a large assembly hall, the industrial commissioner's office, and fire and police headquarters. It will be built of stone three stories high. The provincial government has donated a fine site on the court house square. It will be opposite the new \$10,000 post office to be built this spring.

Halifax, March 24.—A fall of coal in the Springhill coal mines killed two men James Graham and H. C. MacKenzie. The fall occurred on Friday, but the fact that two men were under the coal was not known yesterday, when they were found after a search. One man was working only twenty feet away and not knew of the accident. The fall was slack, so that it fell with very little sound.

DIVA CONGRATULATES MORGAN, FINANCIAL TRUST CHEVROLET SHE HAS SECRET OF ETERNAL YOUTH.

Rome, Mar. 25.—Lina Cavalieri, who arrived here this morning from Paris, charmed to meet J. Pierpont Morgan in the lobby of the Grand Hotel this afternoon. As they shook hands cordially, the diva felicitated the financier on his rugged weathered appearance and his sprightly gait.

Taking a look at the singer, Mr. Morgan responded: "Yes, I feel that, but you, but you alone possess the secret of eternal youth; you will tell me."

The former wife of Robert Winthrop Charles laughed as she replied: "I now trust to man with my secret. Good-by."

Toronto, March 24.—Engineers met and Saturday morning that Toronto's new \$2,500,000 trunk sewer system will be in running order in about six weeks.

KILLS THE DANDRUFF GERM

Stops Falling Hair—Others Immediate and Make Similar Claims But the Genuine and Original Dandruff Germ Destroyer is Newbro's Hairicide.

The discovery of the dandruff germ as the cause of all hair troubles is not a recent event. Prof. Unna gave the germ theory to the world in 1887 and two years later Baldbrand by his experiments with a rabbit proved beyond doubt.

NO PROGRESS MADE IN COAL WAR CONFERENCE

Premier Aquilith in Session All Day With Miners and Mine Owners.

SITUATION CONTINUES TO GROW IN SERIOUSNESS

Railways Must Cut Off All Trains On Branch Lines If Strike Is Not Settled.

London, Mar. 25.—The conference of Premier Aquilith and the members of the British cabinet with the mine owners and miners, respectively, failed through the day, but it was expected that the solution of the dispute had been made. It has not been up to the present sufficient to justify a continuation of the coal trade negotiations between the miners and the coal owners.

The general managers of all the British railways met in London today and tabulated the remaining stocks of coal. The result indicates that if there is not in the course of this week all passenger trains on every branch are in the United Kingdom will be suspended.

In case of death the balance goes to the survivor without any legal formalities.

Ask the Manager about this form of Account.

EDMONTON BRANCH
Manager, J. J. ANDERSON

of the abandonment of the royal journey and the value on the general theory of the day has been without substance. There has been, for inexpressible reason, more sympathy printed about the plans and engagements of the King and Queen than were met about the preceding revolution.

The King's Plans.

The King is going to Knowlton, near Leeds, and his other private intentions have not been cancelled. His continental journey will be made at his own convenience and his Easter holidays will be passed at York cottage. Some important Unionist writers have been announcing that the King will visit Mr. Balfour whenever the government goes down.

It is not likely, however, that His Majesty will cross that bridge before he comes to it. Presumably would require him in such an emergency to send for either Andrew Bonar Law or the Marquis of Lansdowne, and subsequently for Mr. Balfour, were they to recommend that course.

Fears Possible Revolution.

London, Mar. 25.—Peace or grim war is the question to be decided today at a joint conference of No. 19 Downing street, between coal miners, mine owners, the prime minister and the representatives of the government, which is to consider the acceptance of the bill now in parliament acknowledging the principle of the minimum wage. Mr. Aquilith is determined to preemptorily refuse to incorporate, as the minimum scale of wages five shillings for men and two shillings for boys in the bill as requested by the miners. He realizes that this would lead to a surrender to socialism and would lead to an industrial war by the demands of all other industries for similar legislation. He also fears it might lead to a revolution.

King George's Reaction.

King George is seriously concerned by the miners' strike and is deeply troubled by the industrial hardships and strikes imposed upon millions of workers in other trades. He is willing to assist the government in every way to settle the industrial war. He is determined to bring nearly all the workers of England face to face with starvation.

London, the other cities in England, is feeling the pinch. Several returned from a strike and the railway schedules are a farce. Coal is \$15 a ton and provisions are soaring towards famine prices. The country is fast another week many industries now only crippled will be added to the millions already unemployed. Realizing the portentousness of the situation, Mr. Aquilith and his fellow members of the House of Commons, have determined that if the unions today reject the peace proposals they will employ the most drastic measures. With this end in view the Ninety-third Highlanders and other reserves have been instructed to keep themselves in readiness to go anywhere at a moment's notice.

Criticize Both Sides.

While the miners are being rebuked by the public for their clamor, the mine owners in Wales are not escaping condemnation because they refuse to concede anything. Mr. Lloyd George has been working day and night to induce his fellow countrymen to assume a reasonable attitude, but both sides apparently are adamant. The English mine owners are anxious to settle the war. The Scotch owners have been whipped into it. It is possible that the trouble in England and Scotland may be adjusted at today's conference and if the Welsh owners continue obstinate they will be left to shift for themselves without the military protection which they are counting on. The government is trying to settle the strike, but is willing to surrender only to its own policy rather than interfere with the right of the employer and employed to decide upon scales of wages. If the conference fails, bloodshed will probably follow in addition to the horrors of the present appalling situation.

Orders to Troops.

London, Mar. 25.—Significant of the laxness of the government to use drastic measures in case the coal war fails to adjust the minimum wage, bill at today's conference between the miners and the mine owners the Ninety-third Highlanders, who, owing to the strike, have been detained a week at Glasgow instead of proceeding to Fort George, have been ordered to hold themselves in readiness to go anywhere at a moment's notice. It is believed that similar orders have been given to many regiments stationed in various parts of the Kingdom. The premier's determination to end the strike whatever the cost has led the mine owners together with the fact that many troops are starting to leave the effect. Even the Welsh miners, who are the stubborn section, are discontented at their leaders' failure. At the Merthyr colliery, North Wales, three hundred miners returned to work Saturday and brought to the surface eighty tons.

Public Opinion Demands Settlement.

London, Mar. 25.—While the postponement of strike legislation until next week leaves the outcome still uncertain it is obvious that even if the strike prevails it will not last long. The public opinion which was also to be expressed has now been brought to the point of resentment through the discomforts and actual suffering which the strike has entailed. Not only to those who have been thrown out of work through the shutting down of industries for lack of coal, but to hundreds of thousands of those who are weakened and feel the effects of the widespread depression and the consequent loss of living. The leaders of the miners realize this and what is more, they realize the government, which had made such casual use to the miners, are now being forced to take steps to do almost anything to satisfy the labor union, have reached a point where they are likely to refuse to submit to further dictation. Premier Aquilith has already indicated that the government is ready to adjust strong measures if legislation fails to settle the strike. What

will be done is not definitely known, but it is clear that the government is in a difficult position. The miners' strike is a serious matter, and the government is in a difficult position. The miners' strike is a serious matter, and the government is in a difficult position.

A Modern Force in Business

ADVERTISING has established a new order of things in commerce. It has become a mighty power in business progress; a complex yet comprehensible transmitter of many parts for the distribution and selling of merchandise and service.

Its function is fivefold:

To enlighten or educate—to create new wants or to satisfy old ones—to protect and foster legitimate enterprise—to establish a medium of understanding between buyer and seller as a basis for mutual profit and advantage—to prescribe an economical price and the maintenance of a fixed standard of quality.

None knew better than the buying public how well these functions have been fulfilled.

Modern advertising has given us an insight into various manufacturing processes. The producer has taken us, the consumers, into his confidence and told us just how his mine was, his flour, his clothing, etc., is made. We know why certain things should or should not be. Advertising has told us—broadened our understanding and guided our judgment.

Modern advertising has enabled us to unlock the treasure house of the world's divinest melodies through the medium of the player-piano. The motor car has lengthened the business day and brought the farthest country to our door. Men shave in comfort in ten minutes where they used to take twenty. A magic

bottle provides us with cold drinks with the weather at 90 degrees or gives us a warm beverage when Jack Frost dips at 40 below.

Modern advertising has elevated the standard of business ethics. It protects the manufacturer from unscrupulous competition and the consumer from base imitation. It conserves trade—extends business—enables good will. It establishes reputation, the manufacturer or private individual on trial to take his case directly to the public, and to secure the public's judgment on his policy or character based purely upon their respective merits.

Modern advertising has opened up new opportunities to the oppressed and poor of far-off lands. It has turned an unceasing tide of immigration to new countries. It has developed nations, and made the name of the New World a promise of better things among the people of the Old.

All this advertising has done and will continue to do. It is the ever-increasing influence for the advancement of mankind—the most potent, indeed, of the many forces influencing human action.

Plans regarding your advertising problems are available through any good advertising agency or the Secretary of the Canadian Press Association, Room 501, Laurier Building, Toronto. Enquiry involves no obligation on your part—to write if interested.
